Professional summary

I am a motivated, adaptable Computer science graduate who is enthusiastic in front end development. I have been continuously learning the skills in this area by attending online bootcamps and I have also gained some experience having worked as a front-end developer freelancer for the last eight months. I have been geared towards building mobile responsive web apps. I have been collaborating with my friends in doing some projects. I am keen to learn more and gain experience in this field and for this reason, I am looking for a company willing to offer me a placement among their developers, in return, I would offer my full commitment and be a pleasant and friendly addition to your team.

I am therefore looking for a job or an internship as a front-end developer.

Skills

- **Html 5**
- **CSS**
- **JavaScript**
- **Bootstrap**
- **Git**
- **PHP**
